# CONTENTS OF VOLUME 41

## PART 1 (March 1985)

A dose–response model for teratological experiments involving quantal responses
K. Rai and J. Van Ryzin 1
Multivariate slope ratio assay with repeated measurements ..... S. L. Hui and S. H. Rosenberg 11
The use of fitted higher-order polynomial coefficients as covariates in the analysis of growth curves
M. G. Kenward 19
Multiple comparisons in the randomization analysis of designed experiments with growth curve responses
R. V. Foutz, D. R. Jensen, and G. W. Anderson 29
Clustering means in ANOVA by simultaneous testing ..... T. Caliński and L. C. A. Corsten 39
Case–control methods in the presence of multiple failure times and competing risks ..... J. H. Lubin 49
Estimation of a common effect parameter from sparse follow-up data ... S. Greenland and J. M. Robins 55
Estimation of cancer mortality rates: A Bayesian analysis of small frequencies ..... R. K. Tsutakawa 69
Improving estimates of prevalence by repeated testing ..... D. McClish and D. Quade 81
Markov models for covariate dependence of binary sequences ..... L. R. Muenz and L. V. Rubinstein 91
The bias due to incomplete matching ..... P. R. Rosenbaum and D. B. Rubin 103
On pooling across strata when frequency matching has been followed in a cohort study .. C. R. Weinberg 117
The effect of additional follow-up and accrual on survival time data ..... R. Brookmeyer and S. G. Self 129
Confidence intervals for a variance ratio, or for heritability, in an unbalanced mixed linear model
D. A. Harville and A. P. Fenech 137
Maximum likelihood estimation of variance components for a multivariate mixed model with equal design matrices ..... K. Meyer 153
Testing hypotheses about interclass correlations from familial data ..... S. Konishi 167
Perpendicular distance models for line transect sampling ..... S. T. Buckland 177
Estimating the relative abundance of fish from a series of trawl surveys ..... M. Pennington 197
A Bayesian method for sequential sampling and forecasting in agricultural pest management
R. E. Plant and L. T. Wilson 203
A model for avian lung ventilation, and the effect of accelerating stimulation in Japanese quail embryos
B. J. T. Morgan and P. M. North 215
Experimental analysis of food preference transitivity in fish ..... P. W. Colgan and J. T. Smith 227
A runs test based on run lengths ..... P. C. O'Brien and P. J. Dyck 237
Shorter Communications
Estimation of the hazards ratio in two grouped samples
T. Moreau, M. Le Minor, P. Myquel, et J. Lellouch 245
A comparison of several methods of estimating the survival function when there is extreme right censoring ..... M. L. Moeschberger and J. P. Klein 253
Interval estimates for the ratio of the means of two normal populations with variances related to the means ..... C. P. Cox 261
A note on multivariate calibration experiments ..... F. Spezzaferri 267
Line transect estimators for left-truncated distributions ..... J. R. Alldredge and C. E. Gates 273
Using the correct standard errors in comparing subpopulation survival rates in marked populations ..... J. M. Geramita and J. T. Smith 281
Maximum likelihood estimation of variance components in repeated measures designs assuming autoregressive errors ..... H. Mansour, E. V. Nordheim, and J. J. Rutledge 287
The Consultant's Forum
Testing the statistical certainty of a response to increasing doses of a drug
J. W. Tukey, J. L. Ciminera, and J. F. Heyse 295
A note on the Wilcoxon–Mann–Whitney test for $2 \times k$ ordered tables
J. D. Emerson and L. E. Moses 303
Correspondence ..... 311
Abstracts ..... 315
Book Reviews ..... 341
Biometrics Editorial Changes ..... 349
Corrections ..... 351

**PART 2 (June 1985)**

Repeated significance tests for clinical trials with a fixed number of patients and variable follow-up
P. Armitage, I. M. Stratton, and H. V. Worthington 353
Testing for qualitative interactions between treatment effects and patient subsets . . M. Gail and R. Simon 361
Designing phase II studies in the context of a programme of clinical research . . . . . J. Whitehead 373
Parsimonious modelling of capture–mark–recapture studies . . . . . S. F. Crosbie and B. F. J. Manly 385
Goodness-of-fit tests for open capture–recapture models . . . K. H. Pollock, J. E. Hines, and J. D. Nichols 399
Analysis of multiple capture–recapture data using band-recovery methods
C. Brownie and K. H. Pollock 411
Estimation of interaction potentials of marked spatial point patterns through the maximum likelihood method . . . . . Y. Ogata and M. Tanemura 421
Simultaneity and its impact on ecological regression applications . . . . . B. K. Wilson 435
Estimation for a model of multiple malaria infections . . . . . J. Nedelman 447
The ML estimation and testing of generalized ABO-like data with no observed double recessives
J. Nam and J. J. Gart 455
Estimation of a derivative by a difference quotient: Its application to hepatocyte lactate metabolism
A. T. James and R. A. J. Conyers 467
Two-stage analysis based on a mixed model: Large-sample asymptotic theory and small-sample simulation results . . . . . F. G. Giesbrecht and J. C. Burns 477
Generalization of the Mantel–Haenszel estimator to nonconstant odds ratios . . . . . L. J. Davis 487
Investigating maximum power losses in survival studies with nonstratified randomization . . . . . M. Palta 497
Analysis of incomplete multivariate data from repeated measurement experiments
H. Crépeau, J. Koziol, N. Reid, and Y. S. Yuh 505
On the problem of measuring the distance between distribution functions: Analysis of hospitalization versus mortality . . . . . P. Laake, K. Laake, and R. Aaberge 515
Shorter Communications
Efficiency of age-adjusted tests in animal carcinogenicity experiments . . . . . L. M. Ryan 525
A note on statistical methods adjusting for intraclass correlation . . . . . R. Velu and M. McInerney 533
The Consultant's Forum
Assessment of interaction between carcinogens in long-term factorially designed animal experiments
S. G. Machado and K. R. Bailey 539
Reader Reaction: Multivariate bioassay . . . . . E. M. Laska, H. B. Kushner, and M. Meisner 547
Response . . . . . A. Vølund 551
Reader Reaction: Estimating treatment effects in clinical trials subject to regression to the mean
S. J. Senn and R. A. Brown 555
Response . . . . . K. E. James 559
Correspondence . . . . . 561
Abstracts . . . . . 565
Book Reviews . . . . . 591

**PART 3 (September 1985)**

Stimulating statistical progress in a developing country by a link between universities
I. M. Wilson, S. Abeyasekera, R. D. Stern, and V. K. Samaranayake 599
A method for analysing case–control studies with ordinal exposure variables . . . . . J. Cuzick 609
A generalization of the Mantel–Haenszel estimator of partial association for $2 \times 2 \times K$ tables
R. M. Mickey and R. M. Elashoff 623
A new variance estimator for the Mantel–Haenszel odds ratio . . . . . W. D. Flanders 637
A two-sample test sensitive to crossing hazards in uncensored and singly censored data
D. M. Stablein and I. A. Koutrouvelis 643
A new change-in-ratio procedure robust to unequal catchability of types of animal
K. H. Pollock, R. A. Lancia, M. C. Conner, and B. L. Wood 653
Simplified point and interval estimation for removal trapping . . . . . A. P. Soms 663
The line transect method: A nonparametric estimator based on shape restrictions
E. G. Johnson and R. D. Routledge 669
Branching process results in terms of moments of the generation-time distribution . . . . . R. Cowan 681
A stochastic model of insect phenology for a population with spatially variable development rates
J. R. Stedinger, C. A. Shoemaker, and R. F. Tenga 691
Analysis of parallel-line assays with multivariate responses . . . . . E. M. Carter and J. J. Hubert 703

A general noninteractive multiple toxicity model including probit, logit, and Weibull transformations
E. R. Christensen and C.-Y. Chen 711
Shorter Communications
A statistical model for the study of self-fertilization in plants ... V. T. Farewell 727
Asymptotically efficient two-step estimators of the hazards ratio for follow-up studies and survival data ... J. R. Anderson and L. Bernstein 733
Confidence limits for probability of response in multistage Phase II clinical trials
E. N. Atkinson and B. W. Brown 741
Some extensions of a linear model for categorical variables
D. G. Bonett, J. A. Woodward, and P. M. Bentler 745
The Consultant's Forum
Testing for a trend in tumor prevalence rates: I. Nonlethal tumors ... G. E. Dinse 751
Reader Reaction: What is biostatistics? ... C. L. Chiang 771
Response ... M. Zelen 773
Reader Reaction: Maximum likelihood vs. minimum chi-square ... N. Mantel 777
Response ... K. C. Smith, J. L. Robertson, and N. E. Savin 781
Reader Viewpoint: Why proof of safety is much more difficult than proof of hazard ... I. D. Bross 785
Correspondence ... 795
Abstracts ... 797
Book Reviews ... 811
The Biometric Society ... 817
Corrections ... 821

**PART 4 (December 1985)**

Biometry and medical statistics ... P. Armitage 823
Tests for character displacement ... D. F. Sinclair, J. E. Mosimann, and D. A. Meeter 835
Tests for deletion ... D. F. Sinclair, J. E. Mosimann, and D. A. Meeter 847
Correspondence analysis of incidence and abundance data: Properties in terms of a unimodal response model ... C. J. F. ter Braak 859
The grouped continuous model for multivariate ordered categorical variables and covariate adjustment
J. A. Anderson and J. D. Pemberton 875
Cost-efficient number of test sites for ranking entries in field trials ... D. Lindgren 887
Progeny testing with auxiliary traits ... P. Narain 895
Nested analysis of variance with autocorrelated errors ... S. G. Pantula and K. H. Pollock 909
A Cox regression model for the relative mortality and its application to diabetes mellitus survival data
P. K. Andersen, K. Borch-Johnsen, T. Deckert, A. Green, P. Hougaard, N. Keiding, and S. Kreiner 921
A semiparametric model for regression analysis of interval-censored failure time data
D. M. Finkelstein and R. A. Wolfe 933
Sensitivity and specificity of a monitoring test ... E. R. DeLong, W. B. Vernon, and R. R. Bollinger 947
The effect of conditional dependence on the evaluation of diagnostic tests ... P. M. Vacek 959
Analysis of two-period crossover design in a multicenter clinical trial ... J. V. Castellana and H. I. Patel 969
A Bayesian analysis of the two-period crossover design for clinical trials ... A. P. Grieve 979
A mixed-effects model for categorical data ... P. J. Beitler and J. R. Landis 991
Simultaneous small-sample multivariate Bernoulli confidence intervals ... P. Westfall 1001
A Bayesian approach to nonlinear random effects models ... A. Racine-Poon 1015
An intervened Poisson distribution and its medical application ... R. Shanmugam 1025
Shorter Communications
Dépendance de facteurs de milieu dans les estimations de taux de survie par capture–recapture
J. Clobert and J. D. Lebreton 1031
Use of logrank tests and group sequential methods at fixed calendar times
D. L. DeMets and M. H. Gail 1039
Replacement of parents by meritorious offspring in within-family selection
H. A. David and I.-H. Ha 1045
Counting methods for inference in binary mosaics ... P. Hall 1049
The Consultant's Forum
Optimum stratum boundaries for shellfish surveys ... R. Iachan 1053
Rank tests for survival analysis: A comparison by analogy with games
K. K. G. Lan and J. T. Wittes 1063
Reader Reaction: Choice of weights for the O'Brien-Dyck runs test ... R. E. Potthoff 1071
Response ... P. C. O'Brien and P. J. Dyck 1073

Correspondence ..... 1075
Abstracts ..... 1079
Book Reviews ..... 1099
Corrections ..... 1103
Acknowledgements ..... 1105
